

KPIs - Key Performance Indicators

Performance reporting made easy!

All businesses are driven by KPIs of some kind. It is said that up to 70% of managing a business effectively is identifying and managing the KPIs that drive business activity.

Key Performance Indicators, also known as KPIs, are measurable goals agreed upon by your company. KPIs provide everyone in your organization with a clear picture of what is important in order to make your business successful, and defines each person's role in making that happen.

KPIs are typically tied to a company's strategy, performance measures, targets and improvement actions. This is communicated and translated through all business units down to performance plans and personal performance of individual employees.

My Business Manager's web-based software provides all the functionality required to track and view the progress and trends your company is making on its KPIs. We provide easy to understand management reports and dashboards for analysis.

Insight... Understanding... Success

Do you have all the KPIs you need to manage your business?

- Instantly?
- Any time?
- With no effort?

Do you have instant actual comparisons?

- Against budget?
- Against historical performance?
- Against average of the team?

There are 5 easy steps to having your own KPI solution:

1. Set up your KPIs
2. Set up the people that will collect the data
3. Allocate the KPI assignments
4. Manage the results
5. Print the reports

With the My Business Manager web-enabled Performance KPI tools, you can assign sets of KPIs to individual employees to track the performance of;

- Activities
- Assets
- People

My Business Manager tracks all of these dynamically so that you can see the trends and compare the performance of your business to other similar businesses.

We even provide you with a library of common KPIs to help you to select the ones that drive your business.
